Developer Agreement:

To receive a 'will serve' letter from the Marysville Otisco Nabb Water Company, the developer agrees to submit this application along with a non-refundable payment of \$500. This fee covers the cost of conducting a hydraulic model analysis to assess the water needs of the proposed development. Should the analysis indicate that additional infrastructure is necessary to serve the development, the developer will bear all associated costs required to provide water service.

Any future modifications to expand the development will render this review invalid and will require the submission of a new application, along with an additional \$500 fee and a new hydraulic model analysis.
